

## SWIVEL JOINTS SYSTEMS

Swivel joint systems are composed of combinations of swivel joints and pipes. It is possible to achieve desired motions of two points relative to each other by selection of appropriate swivel joints.

For applications where hoses are not considered suitable, the use of swivel joints and pipes is an ideal alternative solution. Rotary connections are developed and manufactured according to customer-defined specifications,

## SWIVEL JOINTS STOCK CODES

Example of orders:

Swivel Joint 1101-0N1N-KKDO: DN100-1000 Series - Style20 - Steel - NBR Oring Seal - PN16 Flanged Connection - With Drain Port

Swivel Joint 5101-332G-KKDO: DN150-5000 Series - Style20 - AISI316TI - Spring Energized Teflon Seal - PN16 Flanged Connection
